

**PORTACAB**

# TRANSPORTABLE UNIT

*The new standard in construction site accommodation,  
where it is needed, when it is needed.*

شركة ألواح الصاج (ش.م.م.)  
Steel Panel L.L.C.

**Portable accommodation exclusively for the construction industry.**

When the deadlines are tight, and the last thing you want to worry about is a site shed, you can count on a Portacab from Steel Panel L.L.C.

With Steel Panel on your side and a Portacab on your site, accommodation will be the least of your worries.

If only everything was as easy to organise as a Portacab.

**Oman's largest range of quality, value for money site sheds.**

You can be sure that Steel Panel will come to the party with what you need, when you need it. The main advantage of using Portacab is the speed in which even major developments can be completed, making sound economic sense when applied to either large or small projects. The units, which are extremely functional, are very modern in appearance

and because of their insulated panel construction are capable of very good energy conservation.

**Ready when you are**

Portacab buildings are fitted out as offices and training facilities, first aid centres, lunch rooms and change rooms, showers and toilets. Portacabs range in size from 3.6 m x 2.4 m buildings up to 12 m x 3.6 m modules. Toilet amenities range from one closet up to five closets. Rapid response and fast delivery pose no problem for Steel Panel. Your Portacab construction site accommodation will be on-site on time, every time.

**We understand your industry**

The people at Steel Panel know the construction industry inside out. Many of us come from a construction background, so we understand the constraints you work to.

We understand that the most important building resources are time and money. Dealing with Steel Panel will save you both.

The Steel Panel customer support team guarantees prompt and professional response to your sales enquiries and service requirements.

### **It's our name on the door as well as yours**

Portacab are as presentable as they are durable. The industry standard buildings are purpose-designed to be hard working and easily maintained, standing up to the toughest treatment.

The quality Portacab product will enhance the appearance of your site and the satisfaction of your workers.

### **Well designed and well maintained**

The Steel Panel maintenance program ensures that all Portacab buildings maintain the highest standards of presentation and performance.

If your Portacab site accommodation needs maintenance, we will be on-site as soon as possible.

### **With the backup of Steel Panel**

When the standard site shed isn't enough to meet your needs, you can draw on the wide range of Portacab buildings. These larger complexes are ideal for project offices and for professional staff on-site.

Steel Panel comprises Oman's largest range of commercial office complexes design.

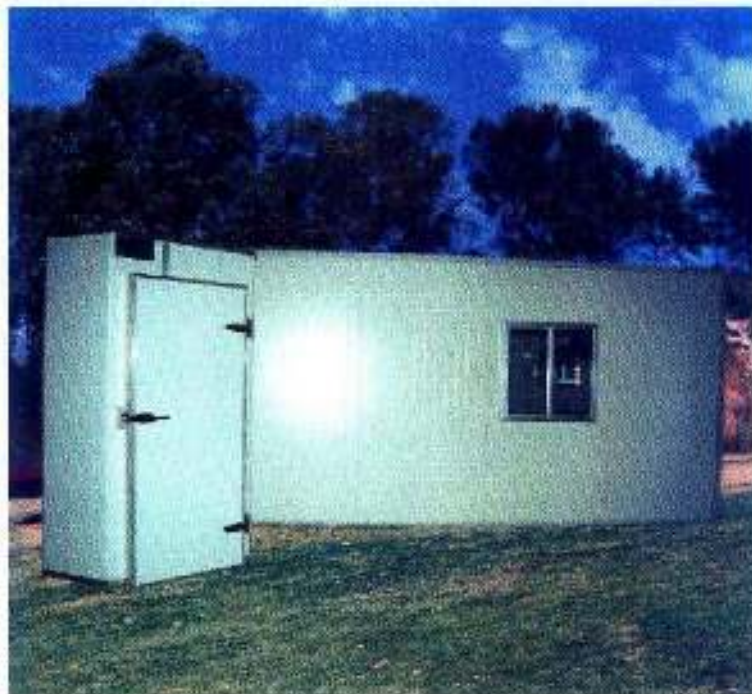

1. Steel Panel Building Systems perform pre-delivery inspections of all Portacab site sheds.

2. Portacab site sheds come in a variety of sizes. This is the standard size Portacab shed.

3. Sandwich panel walls make for a robust building with reduced maintenance and cleaning requirements.

4. Steel Panel can supply and install a large variety of ablation systems tailored to your requirements.

5. Portacab sheds are fitted out with construction site staff in mind

We use structural insulated panels to fabricate the cabins.

The system does not require any steel structure to support the roof, the panels are self supporting.

The insulation (Expanded Polystyrene) used in manufacturing steel panels is mechanically bonded to metal skins, giving better strength and insulation values as compared to loose insulation.

The prepainted cabins are maintenance free, can easily be cleaned with wet cloth & appear as new cabin.
